PROFESSIONAL SUMMARY

Backend engineer with 6 years of experience building scalable, high-traffic systems using Java and Spring Boot. Proven expertise in designing event-driven architectures and optimizing database performance in AWS cloud environments. Committed to technical excellence and efficient development practices through CI/CD automation.

EXPERIENCE

Senior Backend Engineer, Northwind Payments

March 2023 - Present

Madrid

- Lead a team of four engineers maintaining the transaction processing service (Java 17, Spring Boot, PostgreSQL).
- Reduced average API response time from 420 ms to 180 ms by introducing Redis caching and query optimization.
- Designed an event-driven refund workflow using Kafka, handling around 50,000 events per day.
- Set up CI/CD pipelines with GitHub Actions and Docker, cutting deployment time by 60%.

Backend Engineer, Cobalt Logistics

June 2020 - February 2023

Barcelona

- Built and maintained REST APIs for shipment tracking used by 200+ business clients (Python, FastAPI, PostgreSQL).
- Migrated a monolithic application to microservices on AWS (ECS, RDS, SQS).
- Wrote integration and unit tests, raising test coverage from 45% to 85%.
- Mentored two junior developers and conducted weekly code reviews.

Junior Software Developer, Pixelforge Studio

September 2018 - May 2020

Valencia

- Developed internal tools and admin dashboards with Node.js and MySQL.
- Implemented authentication and role-based access control with JWT.
